Pentasent

PRE-SEED • INVESTOR DECK

Building the operating layer for connected healthcare.

Pentasent brings people, healthcare organizations, products, communities, events, jobs, and news into one healthcare ecosystem.

Fundraise: €750k • Target dilution: ~10–12% • Runway: ~24 months

October 2026

Healthcare has products. It lacks a connected ecosystem.

Patients, professionals and organizations still move between disconnected destinations to discover, participate, build and innovate.

THE GAP

The healthcare internet is fragmented by workflow.

Care happens in one place.
Communities in another.
Products somewhere else.
Research, jobs and events elsewhere.

- **Discover** — People, providers, organizations, products
- **Participate** — Communities, events, challenges
- **Build** — Jobs, organizations, professional identity
- **Innovate** — Research, news, products, collaboration

Every healthcare participant is forced to stitch together their own ecosystem.

The fragmentation is structural—not just a missing feature.

Pentasent's job is to make these connections native.

One ecosystem. Four entry points. One healthcare graph.

The experience adapts to what a person is trying to accomplish.

01

FOR ME

Track health, discover care, tools, wellness & trusted information

02

PROFESSIONALS

Build identity, publish expertise, join communities, find jobs & events

03

ORGANIZATIONS

Create presence, list services, products, teams, events & opportunities

04

ECOSYSTEM

Connect research, news, products, communities, events & collaboration

The same underlying ecosystem becomes more valuable as more healthcare entities participate.

A healthcare ecosystem, not a single-purpose app.

The platform is organized around the entities people already encounter in healthcare.

PEOPLE

Profiles, expertise, identity & discovery

ORGANIZATIONS

Hospitals, clinics, companies, institutions

PRODUCTS

Healthcare products, tools & solutions

COMMUNITIES

Peer groups, professional & founder communities

EVENTS

Conferences, workshops, challenges & meetups

JOBS

Healthcare opportunities & talent discovery

RESEARCH

Papers, projects, collaboration & innovation

NEWS

Healthcare updates, insights & ecosystem signals

Start with an intent. Move through the ecosystem.

Pentasent is designed around journeys, not menus.

A PERSON

I want to understand or improve my health.

Discover → Tools → Communities → Trusted providers

A PROFESSIONAL

I want to build my presence and grow my career.

Profile → Expertise → Community → Jobs / Events

AN ORGANIZATION

I want to be discovered and build relationships.

Organization → Services → Products → Talent / Events

AN INNOVATOR

I want to find people, evidence and opportunities.

Research → People → Products → Events / Collaboration

The product becomes harder to replace as a user’s identity, relationships and activity accumulate.

Healthcare is becoming digitally addressable at ecosystem scale.

India is creating the infrastructure, market momentum and behavior for connected digital health.

86.96 crore	4.86 lakh	8.35 lakh	$17.81B
ABHA accounts	**Health facilities**	**Healthcare professionals**	**India digital health**
As of 22 Mar 2026	Registered on HFR	Registered on HPR	Estimated 2025 market

ABDM is explicitly building an integrated, citizen-centric digital health ecosystem.

Pentasent is building the discovery, participation and relationship layer around that infrastructure.

Sources: Government of India / ABDM (22 Mar 2026); Grand View Research (India Digital Health, 2025 estimate)

Multiple revenue streams. One compounding ecosystem.

Monetization follows the value Pentasent creates for each participant.

Organizations	Paid presence, enhanced profiles, team/roster tools, lead generation & integrations
Professionals	Premium profiles, discovery, career and professional tools
Products	Sponsored discovery, launches and category promotion
Communities & events	Paid community capabilities, event promotion and ecosystem programs
Data & infrastructure	Future analytics, ecosystem intelligence and integrations—subject to privacy & compliance

Initial monetization focus: organizations + professional profiles + sponsored ecosystem discovery.

Build supply first. Let network density pull demand.

The initial wedge is healthcare professionals and organizations, where identity and discovery have immediate value.

1

Seed trusted supply

Recruit professionals, clinics, hospitals, organizations and healthcare communities.

2

Create useful profiles

Make profiles discoverable and useful even before the network is dense.

3

Activate participation

Use communities, events, jobs, research and news to create repeat reasons to return.

4

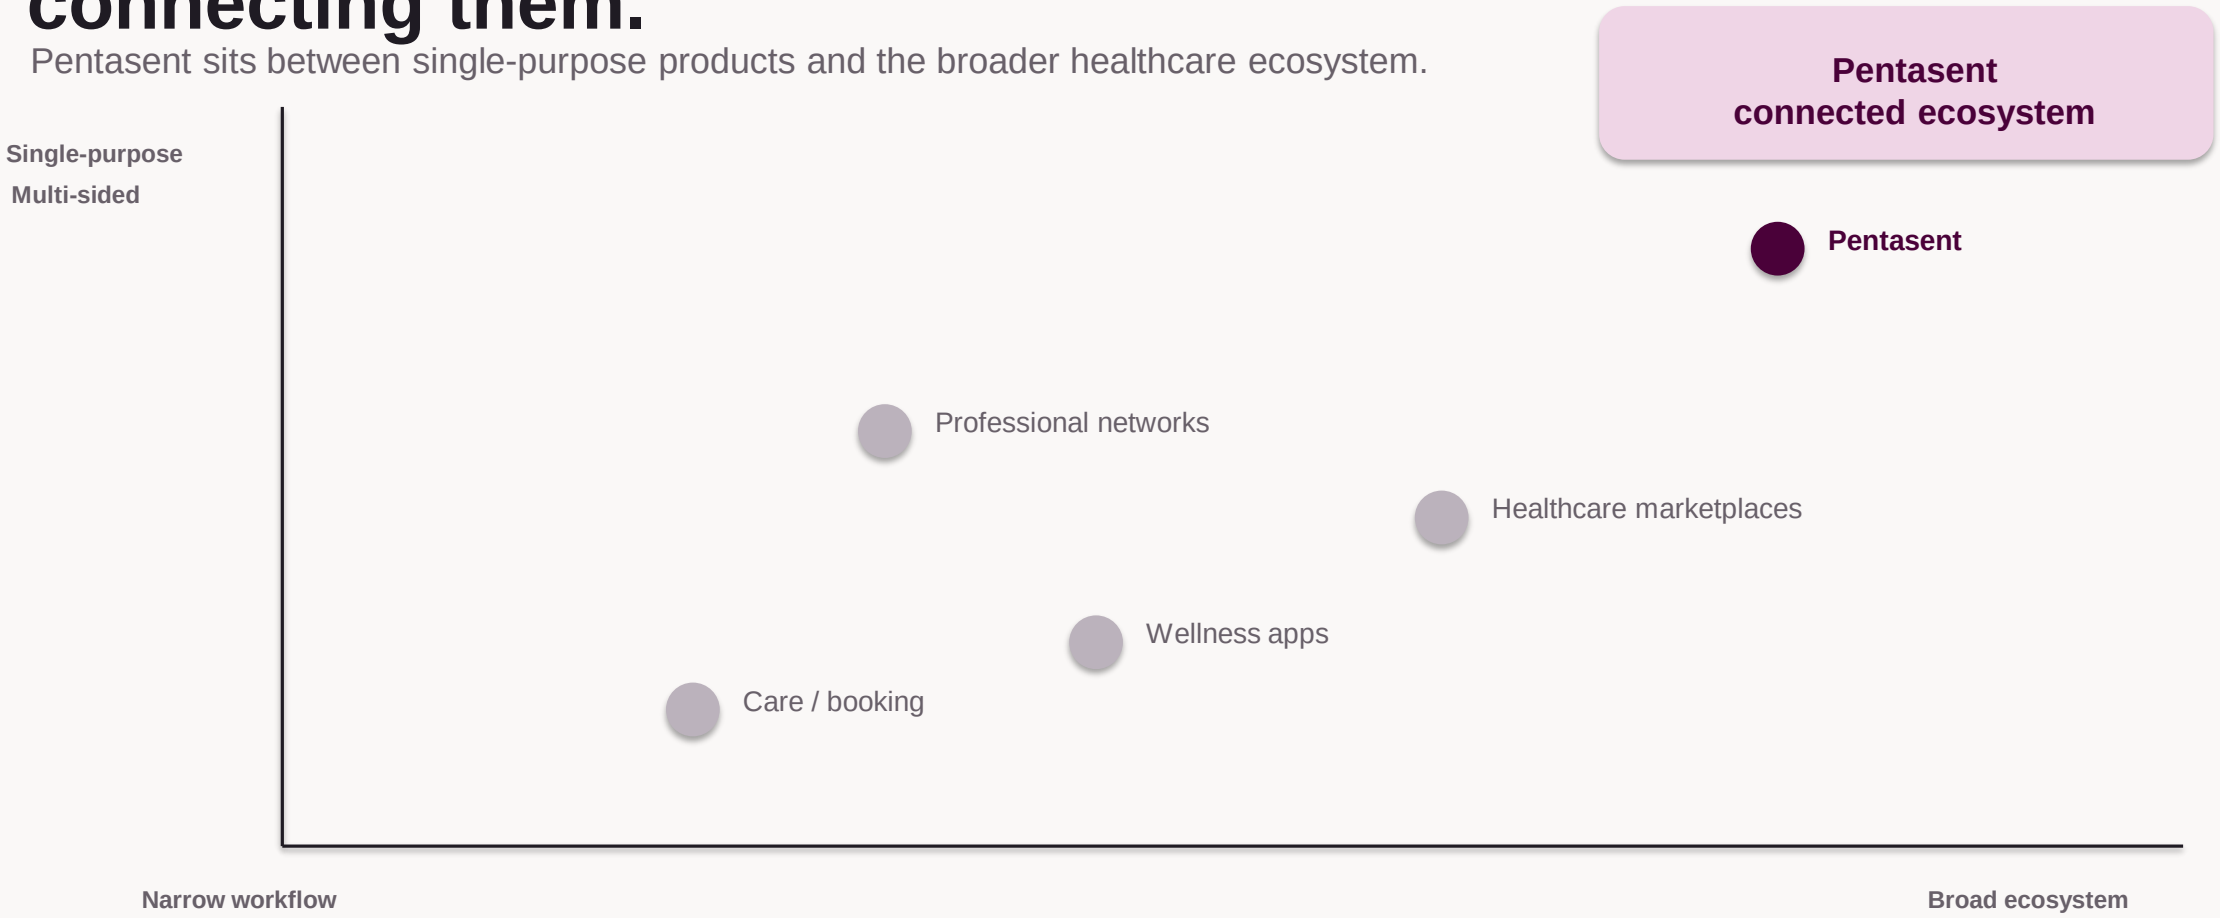

Monetize high-intent demand

Convert organizations and professionals to paid visibility, tools and workflow products.

Distribution loop: identity → discovery → participation → relationships → repeat usage → monetization.

We are not replacing every healthcare product. We are connecting them.

Pentasent sits between single-purpose products and the broader healthcare ecosystem.

The strategic distinction is not feature count. It is the shared graph of entities, relationships and activity.

The moat is the graph, not the interface.

Every verified entity and relationship makes the ecosystem more useful for the next participant.

- **Structured healthcare graph** — People ↔ organizations ↔ products ↔ communities ↔ events ↔ research ↔ news
- **Trust & verification** — Healthcare-specific profiles and organizational credentials create a higher-quality directory layer.
- **Network effects** — More participants create more discovery, more interactions and more reasons for others to join.
- **Compounding activity** — Profiles, events, research, communities and content create persistent ecosystem history.

Long-term advantage: healthcare context + trusted identity + relationships + accumulated activity.

The next 24 months are about proving the engine.

We are raising to turn a broad product thesis into a measurable, repeatable business.

0–6 MONTHS

DENSITY

Strengthen core discovery and profiles
Seed healthcare professionals & organizations
Launch communities, events, jobs and research workflows
Instrument activation, retention and conversion

6–12 MONTHS

REPEATABILITY

Prove repeat usage loops
Launch paid professional / organization products
Build acquisition playbooks
Establish first recurring revenue

12–24 MONTHS

SCALE

Expand categories and geographies
Deepen organization workflows
Grow marketplace / sponsored discovery
Build ecosystem intelligence & integrations

Fundraising milestone: leave this round with evidence of product-market pull—not just a larger feature set.

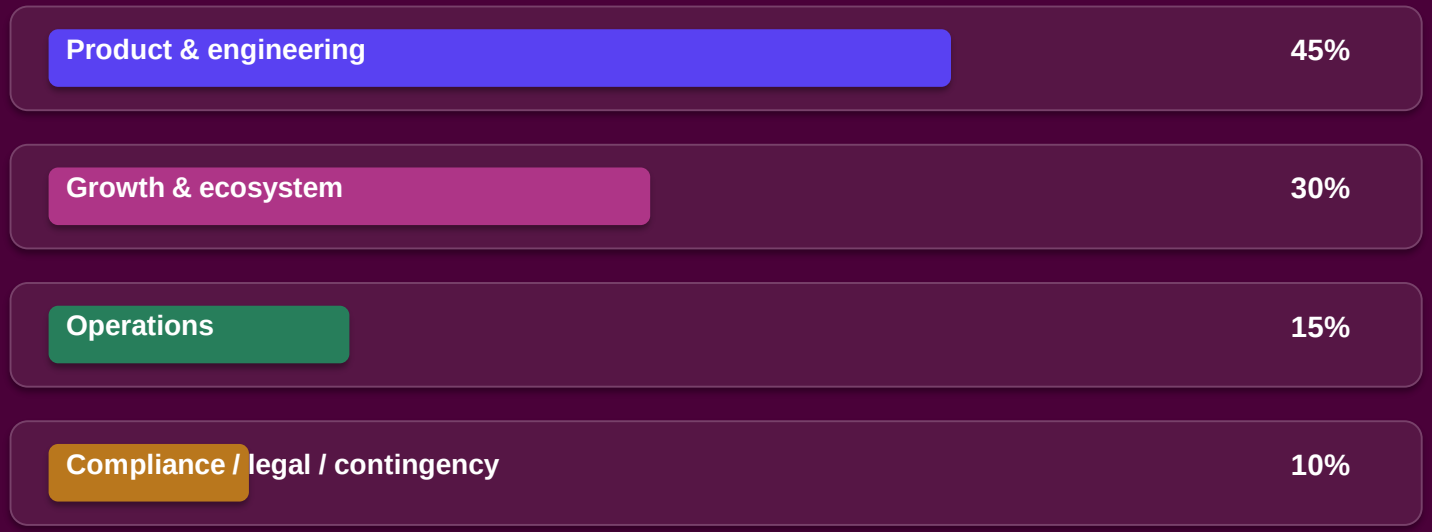

€750k pre-seed to prove the ecosystem can become a business.

A disciplined 24-month plan focused on product, distribution, trust and monetization.

€750k

Target dilution: ~10–12%

Target runway: ~24 months

What this round buys: a measurable acquisition loop, retained users, first recurring revenue, and evidence for the next institutional round.

Valuation principle: preserve founder ownership and price against demonstrated progress; target roughly 10–12% dilution rather than maximizing the headline valuation today.

Capital is tied to proof points, not headcount for its own sake.

The objective is to build a durable healthcare network and demonstrate the economics behind it.

PRODUCT

Ship the core ecosystem cleanly
Improve discovery, profiles and workflows
Instrument the full funnel
Build trust, verification and privacy foundations

DISTRIBUTION

Seed high-quality supply
Build community & event loops
Develop repeatable acquisition playbooks
Turn high-intent discovery into revenue

BUSINESS

Launch paid organization/professional products
Validate pricing and conversion
Build recurring revenue discipline
Prepare for the next financing milestone

The round is successful if Pentasent can show that ecosystem density creates measurable retention and willingness to pay.

Built by a product-led founder who understands both software and the healthcare problem.

Ankit Kumar combines product management, software development and hands-on experience building healthcare products.

Why this founder / market fit

- Thinks in user journeys, not isolated features
- Can take product from idea → design → build → iteration
- Already operating the Pentasent product and infrastructure
- Focused on a long-term healthcare ecosystem rather than a single feature

Pentasent can become the place where healthcare participation starts.

Not another destination for one healthcare task—an ecosystem where people, organizations, products and innovation reinforce one another.

DISCOVERY

We are raising €750k to prove this loop—and build the foundation for the next stage.

Selected market evidence & fundraising notes

Reference material for investor diligence.

MARKET / INFRASTRUCTURE

- Government of India, Ministry of Health & Family Welfare / ABDM: 86,96,38,083 ABHA accounts; 4,85,760 facilities on HFR; 8,35,477 professionals on HPR as of 22 March 2026.
- Grand View Research: India digital health market estimated at $17.81B in 2025; projected $106.97B by 2033 (25.12% CAGR).
- Grand View Research: India mHealth apps market projected at $4.827B by 2030; 17.1% CAGR from 2024–2030.

FUNDRAISING

- Target raise: €750k
- Target dilution: ~10–12%
- Planning runway: ~24 months
- Capital allocation: 45% product/engineering, 30% growth/ecosystem, 15% operations, 10% compliance/legal/contingency
- The valuation should be negotiated against evidence and founder dilution—not treated as a fixed claim in this deck.
